Education

Arid Agriculture University Uiit

Bachelor of Software Engineering

2023 – 2027

Rawalpindi, Pakistan

Relevant Coursework

- Web Development
- C#
- Artificial Intelligence
- software Requirements
- .NET CORE /ASP
- Database Management
- Information Technology
- Computer Networking

Projects

Personal Portfolio | HTML, CSS, JavaScript

April 2026

- Designed and developed a professional, responsive portfolio website to showcase technical projects and experience using a mobile-first approach.
- Implemented complex CSS layouts including Flexbox and CSS Grid to ensure 100% cross-browser compatibility and fluid responsiveness across all device sizes.
- Integrated interactive UI components such as modal windows for project details and a dynamic contact form with custom validation.
- Optimized web performance and accessibility, utilizing smooth-scroll navigation and customized SVG iconography for a modern user experience.

Inventory Management System | React.js, JavaScript, Bootstrap 5

August 2026

- Developed a responsive Inventory Management System for managing products, categories, and stock records.
- Implemented CRUD operations and Local Storage integration for efficient data management and persistence.
- Added search functionality, inventory tracking, and a user-friendly dashboard for improved usability.
